

There's no better time to be set for life.

www.lifefile.com

The idea for LifeFile™ arrived in the middle of the night. I was having trouble sleeping; because three weeks earlier my 69 year-old father had been diagnosed with terminal cancer. He lived alone on the family farm and had now moved in with my family and me during his treatment. I was extremely worried about him and how we could manage his care and business affairs. The farm was 90 miles away and it had been 20 years since I had been involved in its day-to-day operations. I suddenly needed information on everything from health insurance to the IRS. At times it was difficult for my father to communicate and that made locating important information a challenge.

At that time, it would have been a tremendous time saver and stress reliever, if there had been a single resource that listed personal, family, financial or health information; where it might be located, or people who knew where that information could be obtained.

I created LifeFile to be that resource. The new, updated and more comprehensive version 6 in PDF can now be purchased two ways; as an Email attachment to individuals, or on CD for group distribution. Version 6 has greater security with password protection if you wish. Either way you receive LifeFile, you can store and update it on your computer, or print out a copy, complete and store it the old-fashioned way. LifeFile's mission continues to help individuals and/or families record everything from Social Security Numbers to health histories to bank locations to even your funeral or memorial requests—information that's very important in an emergency, business transaction, death, illness, or relocation.

LifeFile is dedicated to my father. Please take time to complete yours; as distributing the attached ID cards to family and friends to let them know where your LifeFile is stored. Every adult in your family should complete a LifeFile and the bonus will be your family's security.
